NEWS ANNOUNCEMENT

For Immediate Release

CHEQUE 21[®] SYSTEM HARDWARE ADDITIONS Digital Check TS230 and MBM DestroyIT

Buffalo Grove, IL August 1, 2006 – Aqubanc, LLC of Buffalo Grove, IL, a leading provider of Check and Form Processing Solutions to non-profits and organizations announced hardware additions for higher speed Digital Check TS230 image scanners and MBM DestroyIT[™] shredders as fully compliant with every Cheque 21[®] System.

The Digital Check TS230 replaces the highly successful TS220E with an improved feeder, highest quality front and back images, ergonomic design with quiet operation, Best Read[®] check MICR reading for accuracy and inkjet endersers. The Digital Check TS230 is available in two models: TS230-65 images up to 65 check-sized documents per minute, or, the TS230-100 images up to 100 documents per minute. Both scanners are ideal for electronic check conversion using US-based ARC or Check 21 rules or for upcoming Canadian Cheque 21[®] rules.

After you've submitted checks electronically what are you going to do with them? The checks must be properly and securely destroyed to prevent identity theft and other potential liability issues. Aqubanc first talked to our hardware partners about who makes the most reliable, trouble-free shredder on the market: everyone recommended MBM. The DestroyIT[™] 2260 with cross-cutting heads is backed by a 10-year warranty. Now Aqubanc includes the DestroyIT[™] 2260 with every Cheque 21[®] System.
