## **NEWS ANNOUNCEMENT**

*For Immediate Release*

### **DIGITAL CHECK SELECTED BY AQUBANC**

**Buffalo Grove, IL – September 15, 2004** – Aqubanc, LLC of Buffalo Grove, IL, a leading provider of Advanced Automated Payment, Check and Form Processing Solutions announces the selection of Digital Check Corporation's TellerScan line of check image scanners for Aqubanc's ARC (Accounts Receivable Check Conversion) and Check 21 solutions.

Aqubanc's final decision was based performance, price and on the availability of a common programming interface (API) that exists today among the entire TS200, TS210, TS220, TS350 and TS400es check image scanners. Distributed exclusively by Digital Check, this common API makes it easier for Digital Check and their software partners to support each other directly.

Having an API that is 100% backed by the scanner manufacturer enables Aqubanc and Aqubanc Software Partners ([CharacTell and DeepCove Labs](#)) to remove dependency on any third-party interface that fails to react to enhancements made by Digital Check to the API. By not having to go through a third-party interface, the expected "finger pointing" is eliminated because Aqubanc can work directly with Digital Check and/or the Aqubanc Software Partners to resolve any issue quickly and decisively.

#### **Aqubanc Company Information**

Aqubanc, LLC is a leading reseller of Payment, Check and Form Processing Solutions. Aqubanc was formed by James Cowen in 2003, and together with the combined industry expertise and direct experienced of other seasoned professionals, has set out to serve the needs of not-for-profit organizations, banking and financial communities, and commercial entities by helping each customer to steward their resources and to *Bank on Accuracy*.
