

LS150

the speed of silence

quiet

A new standard in desktop scanners is being set by the LS150, designed in the tradition of CTS advanced engineering for use by Aqubanc® in nonprofit and charitable organizations. With its super quiet 150 check / cheque per minute speed, the LS150 simply offers the fastest processing in the smallest footprint!

fast

The LS150 is a top performing, compact, stylish, pure and functional design that packages durable and quality construction in all details, to ensure a high productivity over the years. LS150's sturdy, smooth and silent performances will fit the Cheque 21® System environment and perform its tasks.

compact

Everything is properly placed in the right and useful place, enhancing an instinctive ease of use for all: single hand operations, large capacity input and output pockets, a special track for thicker Reply Devices, quick access to transport path to clear jams, and fast consumables replacement.

LS150 leverages all the latest technologies to provide the best image quality and the highest reliability in check MICR-line reading, along with a flexible multi-line endorsement using a standard HP® inkjet cartridge. At 150 Reply Devices and/or checks per minute, the LS150 provided to Aqubanc's clients optimizes performance, document feeding and endorsing.

The Aqubanc exclusive 5-year Advanced Unit Replacement and easy handling complete a hard to beat cost effectiveness profile.

- small footprint
- functional
- pure design
- friendly

With its small footprint, the LS150 leaves more room for Like-Type™ transactions while still offering a fully functional and friendly design. Each Like-Type transaction is inserted via single hand operations and flows-through to a wide output pocket, both with adjustable supports, make the LS150 easy to use.

Easy and comfortable access to all machine parts and consumable supplies is gained without pulling out components or using tools, with clean hinges and magnet locks: forget about loose plastics and rubber fixings!

The onboard USB 2.0 hub helps reducing long cables on busy workstations.
