

OPEX® AS3600i

CORPORATION

Mail Extraction Equipment & Color Scanner for Incoming Mail Processing Solutions

Design

The OPEX AS3600i is a high-speed, color scanner equipped with a unique drop feeder, which operates as part of an OPEX 51 Rapid Extraction Desk for quick and easy mail handling. Designed to provide image capture for a variety of mail, the OPEX AS3600i processes clean payments, exception mail and full-sized documents. This scanner eliminates the time and labor required to batch, prep and scan, offering additional cost saving advantages.

The OPEX AS3600i is intended for remittance, imaging and data capture applications. A single operator can open and capture all kinds of transaction types at top speed, including checks, remittance advice, envelopes, correspondence, lists, Reply Devices, priority mail and other exception types. Separator sheets are unnecessary, so the operator can effortlessly drop and scan documents for smooth processing.

Capabilities & Function

Built onto the OPEX 51 Rapid Extraction Desk, the OPEX AS3600i allows a Gift Processor to open, extract, identify, prep, capture, orient, read, sort create an audit trail and output mail content in one step. As quickly as mail can be opened, it can be scanned immediately. The OPEX AS3600i delivers the functionality of a high-end production scanner, but at a much lower cost.

On the first pass, the OPEX AS3600i offers ASCII or XML output. Data is extracted from each image during the capture process, providing an intelligent scanning solution.

Features & Benefits

The OPEX AS3600i is fully configured to offer Gift Processors extended size, shape, thickness and color of the envelope and pages that can be imaged in the mailroom or a centralized Gift Processing area. The OPEX AS3600i offers:

- ┆ Touch Screen Controls on Color 15" LCD Display
- ┆ Duplex Scanner: 100, 150, 200, 240 & 300dpi
- ┆ 60ppm B&W & Gray Scale at 200dpi
- ┆ Image Output Formats: TIFF & JPEG
- ┆ Minimum Paper Sizes: 2.0" by 3.5"
- ┆ Drop Feeder
- ┆ Imprinter: Front and/or Back
- ┆ In-Line Recognition: MICR Magnetic Ink Characters
- ┆ In-Line Recognition: OCR Optical Character
- ┆ Height Adjustable: Seated or Standing Position
- ┆ Maximum Paper Thickness: 1/16" Thick
- ┆ Operator/Service Clearance: 3.0' all around
- ┆ Cheque 21® System Component
- ┆ PC Controller
- ┆ Double feed, length, thickness & envelope detect
- ┆ 30ppm Color at 100dpi
- ┆ Data Output Formats: Opex IEM, ASCII & XML
- ┆ Maximum Paper Sizes: 8.5" by 17.0"
- ┆ Semi-automatic Pocket Feeder
- ┆ Selectable Color Dropout: Red, Green or Blue)
- ┆ In-Line Recognition: OMR Optical Mark-Sense
- ┆ 6 Output Trays: 4 Fully Sortable, 1 Thick, 1 Reject
- ┆ Motorized Table
- ┆ Sound Level: Below 72dB
- ┆ Electrical: 120VAC, 3.5AMPS, 60HZ
- ┆ SplitPath™ Process Compliant
